## 2024\_28\_III\_OOPS Using Java Lab

### 2028\_REC\_OOPS using Java\_Week 12\_Q2

Attempt : 1

Total Mark : 10

Marks Obtained : 10

#### **Section 1 : Coding**

##### **1. Problem Statement**

Alex is learning about Java's functional interfaces and lambda expressions.

He wants to write a simple program that prints the square of each number in an array using a predefined functional interface.

Help Alex complete this task using the Consumer functional interface.

##### ***Input Format***

- The first line contains an integer N, the number of elements in the array.
- The second line contains N space-separated integers.

##### ***Output Format***

- Print the squares of all elements in the array, separated by a space.

Refer to the sample output for formatting specifications.

**Sample Test Case**

Input: 4

1 2 3 4

Output: 1 4 9 16

**Answer**

```
// You are using Java
import java.util.*;
import java.util.function.Consumer;
public class Main {
    public static void main(String[] args) {
        Scanner scanner = new Scanner(System.in);
        int N = Integer.parseInt(scanner.nextLine());
        int[] numbers = Arrays.stream(scanner.nextLine().split(" "))
            .mapToInt(Integer::parseInt)
            .toArray();
        Consumer<Integer> printSquare = x -> System.out.print((x * x) + " ");
        Arrays.stream(numbers).boxed().forEach(printSquare);
    }
}
```

**Status : Correct**

**Marks : 10/10**
